

The thematic route Penyes Albes and Terrateig will allow us to know, in just 1.1 km, the Municipal Natural Area in the forest lands of Montixelvo and Terrateig. It was declared a protected site in 2010 by the *Generalitat Valenciana* and has an area of 347 Ha. From the orographic point of view, it is a rather complex and steep place, with a significant unevenness, which explains, in addition to its orientation, the biological diversity. It is a haven of well-preserved nature with high botanical and landscape value as we can see.

Shortly after starting the ascent, we will be immersed in dense and exuberant vegetation, and the rains have been generous, the fountains, streams and springs such as *Font Nevera*, *Barranc del Tossal* or *Pla de les Fontetes* will have plenty of water. The climb up the *Umbreta* to Penyes Albes is hard and demanding, since all the unevenness is overcome in just 5 km and soon the Mediterranean forest takes over the path with sections that completely cover it. Here plant species such as the flowering ash are preserved, which have disappeared in the rest of the Ador mountain range. A little further up from *Pla de les Fontetes* we enter a landscape of abandoned crops, which remind us of the harshness of rural life in isolated places. The Penyes Albes emerge on the last terraces and magnify this spectacular setting even more.

From the orographic point of view, it is a rather complex and abrupt place, with a significant unevenness, which explains, in addition to its orientation, the biological diversity.

Roda La Vall d'Albaida

Penyes Albes & Terrateig
Point of connection with the General Crossing:
km 105. Montixelvo

With this thematic route we will discover a very interesting part of the Serra d'Ador, also known as *La Cuta*, an extension of the Benicadell's mountain range, which separates the *Vall del Vernissa* from the *Estret del Serpis*. Penyes Albes and *la Umbrieta*, corresponds precisely to the northern slope of the mountain range.
It has no technical difficulty, the rapid unevenness with which it is accessed in the first 6 km make it a demanding route, but not excessively hard, since the total distance does not exceed 11 km. Suitable for cyclists with certain physical shape.
