

valldalbaida.com

The Surar de Pinet-Llutxent is a natural area located in the Vall d'Albaida, at the north of the region and on the border with La Safor, which preserves the southernmost cork oak forest in the Valencian Community. Its importance lies in the fact that it is very far from the areas where pure cork oak groves, well-structured forests are preserved, in a natural state, that is, without man having participated or contributed to their development, because they find their original habitat in these places.Geology is res possible for the development of cork oaks, since they tend to grow on siliceous soils, and although the maritime pine tree does not appear here, the presence of decalcified clays makes it possible for these plant species to grow. The climate also has a lot to do with the development of this type of vegetation, since this place accumulates a lot of humidity from the sea winds. The Surar area is located between the municipalities of Pinet and Llutxent. Our thematic route starts from the small town of Pinet, the northernmost in the region, at the foot of the Buixarro mountain range and ascends determinedly to the *Pla de la Nевра* overcoming a significant unevenness, to continue to the highest point known as the *Molí de Sabater* at almost 700 m high. From here, already descending, we will pass through the Flora del Surar Micro reserve, where the Surar raft and a small recreational area are located.

Its importance lies in the fact that it is very far from the areas where there are pure cork oaks, forests in a natural state.

The Surar of Pinet - Llutxent Point of connection with the General Crossing: km 142. Pinet

The thematic route of the Pinet's Surar will allow us to know this Protected Natural Area and the Micro Reserve of Flora. It starts and ends in Pinet as a possibility to extend the general cycling route that runs through the Buixarró mountain range, the wettest and rainiest area in the entire region. Technically, the route does not have any difficulty, although it does have a certain unevenness since it reaches 700 m in height from the 377 of Pinet. It is suitable for all audiences with a minimum of physical form since the roads are in good condition, even asphalted in some sections.
