The thematic route starts in the town of Aielo de Malferit on an agricultural road, asphalted in its first section, with a certain unevenness that goes into the fields up to the foot of the mountain range. Depending on the time of year, they have an intense chromatism, as they are mostly deciduous fruit trees. This is a circular route that allows you to extend the general cycle tour and can be done by families with some experience. The route has hardly any technical difficulty, except for a section of the road that we will have to get off the bike because there are a lot of loose stones.
